INDEX TO VOLUME XII

AUTHORS INDEX

In this index following the author's name the title of the subject is given as it appeared in the Journal. Editorials are also included in the list and are indicated by (*E*).

A

ALLEY, R. C. (*See* Haskell, Alley and Prillaman), 313

ALTNOW, HUGO O., AND CAREY, JAMES B. A case of polycythemia vera treated with phenylhydrazin hydrochloride with special reference to changes in blood morphology, 597

ARKUSH, ALBERT. (*See* Proescher, Arkush and Krueger), 908

ARNOLD, LLOYD, AND WEISS, EMIL. Prophylactic and therapeutic possibilities of the Twort-d'Herelle's bacteriophage, 20

ARONSON, JOSEPH D. The standardization of tuberculin, 169

B

BALDWIN, LOUIS C. B. Routine skin tests in chronic nephritis, 1

BALYEAT, RAY M. Factors which determine the pollen content of the air, 1151

BARTLETT, WALTER M. The effect of hypodermic insulin on the fasting blood sugar in normal and diabetic subjects in relation to percentage normal weight, 115

BARTON, R. B. The endothelioid cell in acute leucemia, 855

BAZETT, H. C., AND MCGLONE, B. A portable thermoelectric apparatus for the determination of surface and tissue temperatures, 913

BECKER, S. WILLIAM. The anticomplementary reaction of blood serum to the Kolmer complement-fixation test controlled by the reaction to the Kahn precipitation test, 265

—. The sugar and chloride content of the cerebrospinal fluid with special reference to neurosyphilis, 43

BENDIXEN, P. A., AND LAMB, F. H. Malignant tumors of the adrenal in children, 130

BLACK, J. H. The oral administration of pollen, 1156

BLALOCK, ALFRED. A rubber mask for determination of oxygen consumption of the dog, 378

BOND, W. R. (*See* Haag and Bond), 882

BROWN, GRAFTER TYLER. Eosinophilia in asthma, hay fever, and allied conditions, 1145

BUNKER, HENRY A., JR., AND MEYERS, SIDNEY. Blood groups in general paralysis, 415

BURBANK, REGINALD. (*See* Hadjopoulos and Burbank), 973, 979

BUTLER, C. S., AND PETERSON, E. Treponematosis as seen in the rural population of Haiti, 670

BYRD, THOMAS LUTHER. Studies of quantitative blood-sugar estimation, 609

C

CALHOUN, J. A. (*See* Waddell and Calhoun), 991

CANTAROW, A. (*See* Caven and Cantarow), 76

CAREY, JAMES B. (*See* Altnow and Carey), 597

CAVEN, W. R., AND CANTAROW, A. A method for the determination of calcium in whole blood, 76

CAYLOR, HAROLD D. A new method of examining fresh tissue, (*E*), 1035

CHANDLER, JOSEPH. The determination of fibrin in blood plasma, 1092

COCA, ARTHUR F. Studies in hypersensitiveness, 1135

COHEN, SEYMOUR J. Studies in local anesthesia. VI. 983

COOKE, EDWARD F. Welcome to Dallas, 661

CRAVER, LLOYD F. Metastasis to thyroid gland from endothelial myeloma of bone; rapid regression resulting from roentgen-ray treatment, 878

CROCKER, FRED L. (*See* Jones and Crocker), 482

D

DAVENPORT, C. K. (*See* Gilbert and Davenport), 944

DAVENPORT, H. A. A note on the Koch and McMeekin method for the determination of nitrogen; with special reference to the nonprotein nitrogen of blood and urine, 286

DAWSON, W. T. A note on chloretone anesthesia of dogs, 139

DE EDS, FLOYD. Normal blood counts in pigeons, 437

DOCK, WM. (*See* Hartman and Dock), 430

DUPRAY, MARTIN. A colorimetric method for the determination of iron and hemoglobin in the blood, 917

—. A modified digestion acid for nonprotein nitrogen determination, 387

DURANT, R. R. An improvised metal cannula, 1011

E

EBEL, ELSA. (*See* Thompson and Ebel), 1087
ELVEHJEM, C. A., AND WADDELL, J. A standard method of recording the hemoglobin content of blood, 889
ERLANGER, JOSEPH, AND MEEK, W. J. An adjustable sphygmoscope for the recording sphygmomanometer, 172
ERVIN, DWIGHT. Acetone body formation and the chemical affinity of oxygen for carbohydrate and fatty acid, 1059
—. A contribution to the nature of diabetes. A mathematical derivation of the blood-glucose curve, 318
EVERETT, MARK R., AND HART, M. O. The determination of sugar in normal urine, 579

F

FEDER, J. M. Intestinal amebiasis from the pathologist's standpoint as related to the clinical picture, 451
FEEMSTER, ROY F. A variable filter for the microscope, 1116
FERRY, N. S., AND FISHER, L. W. The rôle of the washings of Streptococus scarlatinae in scarlet fever, 274
FISHER, L. W. (*See* Ferry and Fisher), 274
FORMAN, JONATHAN. The sedimentation rate of erythrocytes; the corpuscle volume; and the icterus index, 373
FOX, HERBERT, AND LEAMAN, WILLIAM G. Observation on blood cultures with a special reference to the quantity of the blood used, 145
FULLER, HENRY C., AND HUNTER, OSCAR B. Isopropyl alcohol—an investigation of its physiologic properties, 326

G

GAARDE, FRED W., AND MAYTUM, CHARLES K. Further observations in the treatment of hay fever with ephedrin, 1203
GIBBS, O. S. Drop-recorder, 686
GIBSON, H. V. A method for capillary blood sugar, 906
GILBERT, RUTH, AND DAVENPORT, C. K. Failure of the mouse test to demonstrate the presence of type I pneumococcus in sputum. An unusual instance, 044
—, AND STEWART, CONSTANCE. Corynebacterium ulcerans: A pathogenic microorganism resembling C. diphtheriae, 756
GIORDANO, ALFRED S. The diagnostic value of the sugar content in the cerebrospinal fluid, 858
GRADWOHL, R. B. H. Description of a new hydrogen-ion colorimeter, 694
GRAHAM, GEORGE S., AND MCCARTY, SARAH H. Notes on sickle cell anemia, 536
GRAY, HORACE. Diabetic gangrene treated by insulin, 472

H

HAAG, H. B., AND BOND, W. R. Some notes on glycol; glycol-chloretone anesthesia, 882
HADEN, RUSSELL L. Progress in the treatment of pernicious anemia, (*E*), 722
—. The elective localization of bacteria in heart and vascular disease, 31
HARDENBERGH, JOHN G. Epidemic lymphadenitis with formation of abscess in guinea pigs due to infection with hemolytic streptococcus, 119
HADJOPOULOS, L. G., AND BURBANK, REGINALD. The origin and nature of the Wassermann antigen, 973
— AND —. The duality of the antigenic nature of erythrocytes, 979
HALL, W. W. The Van Den Bergh reaction for serum bilirubin with notes on interpretation and technic, 529
HART, M. O. (*See* Everett and Hart), 579
HARTMAN, F. W. (*See* Jackson and Hartman), 442
HARTMAN, HANS, AND DOCK, WM. The use of cholin in paralytic ileus, 430
HASKELL, CHAS. C., ALLEY, R. C., AND PRILLAMAN, P. E. Exsanguination-transfusion in treatment of phenol poisoning, 313
HASKINS, HOWARD DAVIS. (*See* Holbrook and Haskins), 10
HECKER, F. A. The treatment of one hundred five cases of acid intoxication with buffer solutions, 467
HEIN, GORDON E. Cedar oil as an aid in finding parasitic ova in feces, 1117
HENRY, LUCY DELL, AND MARSHALL, M. S. The stability of carbohydrate mediums, 474
HERRMANN, GEORGE R. Some clinical tests for the estimation of circulatory-respiratory functional efficiency, (*E*), 828
HERSOHN, W. W. (*See* Kilduffe and Hersohn), 810, 946, 988
HILLKOWITZ, PHILIP. The integration of hospital laboratory work, 666
HOLBROOK, WILLIAM PAUL, AND HASKINS, HOWARD DAVIS. Blood uric acid in nephritis, 10
HOLLISTER, GUY L. (*See* Stier and Hollister), 1139
HOLMAN, W. L., AND KROCK, F. M. The effect of paraffin and oily substances upon filter candles, 158
HUEPER, WILHELM. Mesenteric enterocystoma, 427
HUNTER, OSCAR B. (*See* Fuller and Hunter), 326

I

ISHAM, ROBERT M. The use of isopropyl alcohol in the preparation of Wassermann antigens, 52
IVY, A. C. (*See* McEnery, Meyer, and Ivy), 349, 362

J

JACKSON, D. E. A new type of motor-driven long paper kymograph, 170
—. A universal artificial respiration and closed anesthesia machine, 998
—. Ephedrin, (*E*), 624
JACKSON, EDNA, AND HARTMAN, F. W. Experimental bacillus pyocyaneus keratitis, 442
JACOBS, MAURICE S. (*See* Steinfield and Jacobs), 850
JONES, RODNEY. Oxalic Acid, A good white cell diluting fluid, 614
JONES, WALTER CLINTON, AND CROCKER, FRED L. Leucocytic indices of body resistance with report of a new index, 482

K

KAHN, I. S. Essential differences in chronic pollen hay fever and asthma in children and in adults, 1197
KAHN, MAX. Effect of Bacillus acidophilus on intestinal putrefaction and indican output, 226
KATAYAMA, ICHIRO. Studies in blood glycolysis, 239
KEHOE, ROBERT A. On the toxicity of tetraethyl lead and inorganic lead salts, 554
KELLOGG, WILFRED H., AND WELLS, L. AMY. The influence of magnesium salts on amboceptor and complement titrations, 153
KILDUFFE, ROBERT A. Cults and their relation to medical practice, (*E*), 1033
—. A note upon the preservation of sheep cells for use in complement-fixation tests, 255
—. The epidemiology of pneumonia, (*E*), 309
—. Details, (*E*), 311
—. Liver function test, (*E*), 523
—. The chemotherapy of streptococcemia, 572
—. The menace of the slightly positive Wassermann, 627
—. The etiology of granuloma inguinale, (*E*), 929
—. Laboratory examinations—not laboratory test, (*E*), 1133
— AND HERSOHN, W. W. The preparation of colloidal gold solution, 810
— AND —. A study of the micro-Kahn test in syphilis. A report of 2100 reactions, 946
— AND —. A note upon the bacteriology of excised tonsils, 988
KILLIAN, JOHN A. (*See* Shattuck, Killian, and Preston), 802
KLEINMANN, HANS. On nephelometry, 629
KLINE, GORDON M. The demonstration of bacteriophage in old stock cultures, 1074
KLINE, B. S., AND YOUNG, A. M. A microscopic slide precipitation test for syphilis, 477
KOBER, PHILIP ADOLPH. The preparation of potassium and sodium tetrabismuth tartrates, 962
KRASNOW, FRANCES. (*See* Rosen and Krasnow), 157
KROCK, F. M. (*See* Holman and Krock), 158
KRUEGER, ALBERT. (*See* Proescher, Arkush, and Krueger), 908
KRUEGER, A. P. (*See* Proescher, Ryan and Krueger), 57

L

LAMB, F. H. (*See* Bendixen and Lamb), 130
LEAMAN, WILLIAM G. (*See* Fox and Leaman), 145
LEAS, R. D. Reducing substances in the urine, 15
LEIBOFF, S. L. A note on the measurement of blood for chemical examination, 911
—. A rapid method for the determination of chlorides in blood or urine, 702
LEVINE, VICTOR E., AND MAGIERA, ESTELLE A. Studies in toxicologic chemistry, 773
LEWIS, W. B. The glucose tolerance test, 380
LIPPINCOTT, LEON S. Hemoglobin and erythrocytes in the south, 679
LOWY, OTTO. Clinical results with pathogen, 465

M

MACLEOD, J. J. R. New views on carbohydrate metabolism, (*E*), 719
MAGIERA, ESTELLE A. (*See* Levine and Magiera), 773
MANHEIMS, PERRY J., AND MCGRATH, IRENE S. A simple blood culture technic, 607
MARSHALL, M. S. (*See* Henry and Marshall), 474
MAYTUM, CHARLES K. (*See* Gaarde and Maytum), 1203
MCCARTY, SARAH H. (*See* Graham and McCarty), 536
MCCOY, ELIZABETH F. (*See* Wright and McCoy), 795
MCENERY, E. T., MEYER, JACOB, AND IVY, A. C. Studies on nephritis. II. Gastric secretion in nephritis, 362
—, —, AND —. Studies on nephritis. I. Physiologic and anatomic changes following temporary ischemia of the kidneys, 349
MCGLONE, B. (*See* Bazett and McGlone), 913
MCGRATH, IRENE S. (*See* Manheims and McGrath), 607
MCGUIGAN, H. A. The pharmacology of iron and aluminum in relation to therapeutic uses, 790
MCJUNKIN, F. A. The large mononuclear and the transitional leucocyte of human blood, 71
MCMINN, H. E. (*See* Piness and McMinn), 1164

MEEK, W. J. (*See* Erlanger and Meek), 172
MEINICKE, ERNST. (Translated by Mollmann, A.), Flocculation test in the serology of syphilis, 891
MEYER, JACOB. (*See* McEnery, Meyer and Ivy), 349, 362
MEYERS, SIDNEY. (*See* Bunker and Meyers), 415
MOISE, THEODORE S. (*See* Sooy and Moise), 1113
MOLLMANN, A. (*See* Meinicke), 891
MOORE, ANNA C. A note on the method of diluting antigens for use in the complement-fixation test for syphilis, 594
MOORE, ROBERT A. (*See* Scott and Moore), 461
—. (*See* Spohr and Moore), 438
MYERS, VICTOR C. Alkalosis (*E*), 104

N

NICHOLSON, DANIEL. A combined diluting and staining fluid for differential leucocyte counts in the counting chamber, 548
NIXON, CHARLES E. (*See* Rusk and Nixon), 644
NIXON, CHARLES E., AND OLIVER, JEAN. Early infantile progressive muscular atrophy (Werdnig-Hoffmann) A clinical and pathologic study of two cases, 837

O

OGAWA, ISAMU. A note upon complement fixation in tuberculosis, 563
O'KEEFE, EDWARD SCOTT. Influence of the capillary circulation upon certain allergic conditions, 1149
OLIVER, JEAN. (*See* Nixon and Oliver), 837
ORENT, ELSA R. Sugar in blood, 432
OSGOOD, EDWIN E. Tables for calculation of color index, volume index and saturation index based on recently determined standards, 899
OSTERBERG, ARNOLD E., AND STRUNK, JOY. A comparison of the Folin-Wu and new Benedict methods for the estimation of blood sugar, 278

P

PATTERSON, T. L. Gastric movements in the pigeon with economy of animal material. Comparative studies. V. 1003
PEARCY, J. FRANK, AND WEAVER, M. M. Barbituric acid derivatives as anesthetics and methods for administration, 1071
PENDLETON, WALTER R. Methods for preventing the agglutination of blood by glucose solutions, 369
PETERSON, E. (*See* Butler and Peterson), 670
PIATETZKY, A. (*See* Short and Piatetzky), 1098
PICKARD, RAWSON J. The pathogenicity of the small races of the "Ameba of Dysentery," 743
—. The ameba coucilmania lafleuri, its appearance and clinical importance, 1037
PINESS, GEORGE, AND MCMINN, H. E. The rôle of the structural features of pollen grains in identifying the most important hay fever plants of California, 1164
PLASS, E. D., AND ROURKE, M. D. The effect of venous stasis on the proteins of blood plasma and on the rate of sedimentation of the red blood corpuscles, 735
POLOWE, DAVID. The blood-urine density index, 1100
PORRO, THOMAS J. Rapid-mixing flasks for the preparation of the standard antigen dilution used in the Kahn precipitation test, 182
PRESTON, MARJORIE. (*See* Shattuck, Killian, and Preston), 802
PRILLAMAN, P. E. (*See* Haskell, Alley, and Prillaman), 313
PROESCHER, FREDERICK, ARKUSH, ALBERT, AND KRUEGER, ALBERT. Methods for making a stable emulsified syphilitic antigen, 908
PROESCHER, F., RYAN, F., AND KRUEGER, A. P. Report of a case of coccidioidal granuloma with autopsy findings, 57

R

RACKEMANN, FRANCIS M. Studies in Asthma, A clinical survey of 1074 patients with asthma followed for two years, 1185
RAMSDELL, SUSAN GRIFFITH. A note on the complement-fixation reaction in antipollen serum, 259
RICHTER, CURT P., AND WANG, GING H. New apparatus for measuring the spontaneous motility of animals, 289
ROCKWOOD, REED, AND SZCZYPINSKI, ADAM. Modification of the icterus index, 813
ROHDENBURG, G. L. An analysis of 500 tumors of the ovary, 211
ROOS, C. On the cultural characteristics of lacto-bacillus acidophilus, 1053
ROSEN, ISADORE, AND KRASNOW, FRANCES. A note on the calcium content of the serum of normal adults, 157
ROSS, S. GORDON. A study of bile secretion from a case of biliary fistula, 1067
ROSS, VICTOR. Immunization of rats against pneumococcus by feeding the acid-killed germs and the influence of the age of the animal thereon, 566
ROTH, PAUL. Oxygen therapy. A method of administration and apparatus, 388
ROURKE, M. D. (*See* Plass and Rourke), 735

ROWE, ALLAN WINTER. A new mask for use in basal metabolism determinations, 590
—. Note on the quantitative determination of arsenic in organic material, 150
RUCKER, JAMES B., JR. A simplification, not a modification of the Kolmer test, 1109
RUEDIGER, E. H. Comparison between the Kahn flocculation test, the Kolmer Wassermann test, and the Ruediger Wassermann test, 269
RUSK, GLANVILLE Y., AND DIXON, CHARLES E. Diffuse cortical sclerosis, a clinical and pathologic report of two cases, 644
RYAN, F. (*See* Proescher, Ryan and Krueger), 57

S

SAETHRE, H. (*See* Thjotta and Saethre), 762
SALLE, A. J. A simplified method for the preparation of special liquid blood media by filtration, 1009
SANDERSON, EVERETT S. Spontaneous death in a rabbit with the isolation of a type IV pneumococcus, 1065
SANFORD, ARTHUR H. A photographic method of counting blood cells, 456
SCHWENTKER, FRANCIS F. A simpler method for the preparation of potassium pyrogallate solution for metabolic rate determinations, 287
SCOTT, ERNEST, AND MOORE, ROBERT A. Ochronosis, 461
SHATTUCK, HOWARD F., KILLIAN, JOHN A., AND PRESTON, MARJORIE. A comparison of the quantitative methods for the bilirubin of the blood, 802
SHAW, FREDERICK W. An infection of man probably due to salomella suipestifer, 141
—. A monilia from the respiratory tract, 968
SHAWEKER, MAX. A convenient method of collecting small amounts of serum, 184
SHORT, JAMES J. An apparatus for rapid quantitative routine determination of albumin and sugar in urine, 1205
— AND PIATETSKY, A. Note on urine preservatives, 1098
SILVETTE, HERBERT. A chart for reading the color index of blood, 1108
—. A device for the dilution of antigen in the Kahn precipitation test, 1096
SLEEPER, FRANCIS HARPER. (*See* Walker and Sleeper), 1048
SOMOGYI, MICHAEL. Note on the tungstic acid precipitation of blood proteins, 800
SOOY, J. W. AND MOISE, THEODORE S. A method for the determination of the coagulation time and retraction time of the blood, 1113
SPOHR, CARL L., AND MOORE, ROBERT A. A study of the pigment in Addison's disease, 438
STARK, MARION E. The chloride content of canned sauerkraut, 561
STASIAK, A. The influence of diet on the physiologic assay of insulin, 256
STEINFIELD, EDWARD, AND JACOBS, MAURICE S. A study of the toxic filtrates of anhemolytic streptococci, recovered from patients with rheumatic fever, 850
STEWART, CONSTANCE. (*See* Gilbert and Stewart), 756
STEWART, ZELLA WHITE. Treatment of asthmatic patients affected by protein of the epidermal group, 1179
STIER, ROBERT F. E., AND HOLLISTER, GUY L. A comparative study of pollen antigens as determined by the skin reaction, 1139
STONER, WILLIAM H. Notes on basal metabolism. IX. Simplified calculation for gasometer gas analysis method, 884
STRUNK, JOY. (*See* Osterberg and Strunk), 278
SWAN, MARY H. Three phases of Wassermann technic: Associated considerations, a comparison of antigens, and a method of titrating and estimating positivity of a serum, 865
SZCZYPINSKI, ADAM. (*See* Rockwood and Szczypinski), 813

T

TASHIRO, SHIRO. Japanese medical education, (*E*), 826
THJOTTA, TH., AND SAETHRE, H. Observations on the relationship of the Wassermann reaction, cells and globulin content, and of colloidal gold precipitation reaction of spinal fluid in syphilities, 762
THOMPSON, LAWRENCE D., AND EBEL, ELSA. A comparison of 10,000 Wassermann and Kahn tests run in parallel, 1087
TURLEY, L. A. The difficulties and value of frozen section methods, 492

U

UNGER, LEON. Clinical investigations in allergy, 1159

V

VAN ALLEN, C. M. Volume measurement of blood platelets, 282
VAUGHAN, WARREN T. The functional pathology of nephritis, (*E*), 204
—. Sclerosis of the pulmonary artery, (*E*), 411
—. The reviews, (*E*), 414
—. Some recent contributions on the treatment of pneumonia, (*E*), 931
—. The reactions of the omentum, 1028

VAUGHAN, WARREN T. The broader aspects of allergy, (*E*), 1213
—. Footprints, (*E*), 1217
VISHER, JOHN W. Spirochetal bronchitis. Report of a case successfully treated with arsphenamine, 55

W

WADDELL, J. A. The action of pilocarpin on the rat's pupil, 232
— AND CALHOUN, J. A. The action of indol and skatol on the heart, 991
WADDELL, J. (*See* Elvehjem and Waddell), 889
WALKER, BURNHAM SARLE, AND SLEEPER, FRANCIS HARPER. Tryptophane reactions in the spinal fluid, 1048
WANG, GING H. (*See* Richter and Wang), 289
WATSON, E. M. A method for estimating blood pressure in rabbits, 706
WEAVER, M. M. (*See* Pearcy and Weaver), 1071
WEBB, GERALD B. Ring and Flocculation tests in tuberculosis, (*E*), 1023
WEISS, EMIL. (*See* Arnold and Weiss), 20
—. The behavior of bacteriophage in sugar media, 937
WELLS, L. AMY. (*See* Kellogg and Wells), 153

SUBJECT INDEX

A

Abdominal puncture in diagnosis of acute intraperitoneal disease, 403
Abstracts, 78, 185, 293, 393, 501, 615, 711, 814, 921, 1013, 1119, 1209
Acetone, body formation and the chemical affinity of oxygen for carbohydrate and fatty acid, 1059
  insoluble antigen, 53
Acid, blood uric, in nephritis, 10
  intoxication, treatment of, with buffer solutions, 467
Acidosis in the toxemia of pregnancy, 816
Acids and base, concentration of, in normal plasma, 393
Acute arteritis, case of, 41
  auricular fibrillation, case report of, 33, 38
  leucemia, endothelioid cell in, 855
  myocarditis, case report of, 33
  phlebitis and myocarditis, case report of, 37
Addison's disease, pigment in, study of, 438
Adenocarcinoma arising from cystadenoma, 219
Adrenal in children, malignant tumors of, 130
Agglutinin-agglutinogen formula, study of, in ninety-one cases, 415
Agranulocytosis, 814
Air, pollen content of, factors which determine, 1151
Albumin and sugar in urine, apparatus for rapid quantitative routine determination of, 1205
  quantitative determination of, by Tannin, 1020
Albuminuria in children, 1209
Alcohol, excretion of, in the urine as a guide to alcohol intoxication, 296
  isopropyl, preparation of Wassermann antigens in, 52
Alcoholic intoxication, excretion of alcohol in the urine as a guide to, 296
  extracts, simple, 53
Alkalosis, 104
Allergic conditions, influence of capillary circulation upon certain, 1149
  rhinitis, 1162
Allergy, broader aspects of, 1213
  clinical investigations in, 1159
  eosinophilia in, 1146
Alopecia, syphilitic, its relation to neurosyphilis, 295, 519
Amboceptor titration, 154
Ameba councilmania lafleuri, its appearance and clinical importance, 1037
  of dysentery, pathogenicity of the small races of, 743
Amebae, detection of, in cases of chronic systemic amebic infection, 1015
Amebic infection, 1015
American Society of Clinical Pathologists, 725
    the fifth convention, 708
Anacidity, diagnostic value of, 714
Anaerobes, spore-forming, blood agar plate for, 295
Anaerobic infection, 924
Anaphylaxis, relation of, to immunity, 505
Anemia, familial pernicious, 1014
  pernicious, blood sugar in, 190
    blood transfusion in, 299
    etiology and treatment of, 921
    high color indices in, 714
    progress in treatment of, 722
    treatment of, by special diet, 819
  relation of, primary and secondary to vitamine A deficiency, 923
  relationship between renal insufficiency and, 512
  sickle cell, 536
Anesthesia, chloretone, of dogs, 139
  glycol-chloretone, 882
  local, studies in, 983
  machine, universal artificial respiration and closed, 998
Anesthetics, barbituric acid derivatives as, and methods for administration, 1071
Angina pectoris, myocarditis with, case report of, 39
Anhemolytic streptococci, toxic filtrates of, recovered from patients with rheumatic fever, 850
Animal material, economy of, gastric movements in the pigeon with, 1003
Anthrax bacilli, immunization of sheep by means of, 926
Anticomplementary reaction of blood serum to the Kolmer complement-fixation test controlled by the reaction to the Kahn precipitation test, 265
Antigen, acetone insoluble, 53
  in the Kahn precipitation test, device for the dilution of, 1096
  syphilitic, methods for making a stable emulsified, 908
  water-soluble, purification of, 504
  Wassermann, origin and nature of the, 973
Antigenic nature of erythrocytes, duality of, 979
  value of the toxin-antitoxin precipitate of Ramon, 503
Antigens, method of diluting, for use in the complement-fixation test for syphilis, 594
  Wassermann, isopropyl alcohol in preparation of, 52
Antipneumococcus serum and antibody solution, specific precipitates obtained from, by the soluble specific substances of pneumococci, 303
Antipollen serum, complement-fixation reaction in, 259

Apparatus for measuring the spontaneous motility of animals, 289
for rapid quantitative routine determination of albumin and sugar in urine, 1205
for the isolation of single bacterial cells, an accessory to the chambers, 795
thermoelectric, a portable, for determination of surface and tissue temperatures, 913
Appendix, bilharzia infection in an apparently normal, 189
Arsenic in organic material, quantitative determination of, 150
Arsphenamine, spirochetal bronchitis, successfully treated with, 55
Arteritis, acute, case of, 41
pulmonary, 409
recurrent acute phlebitis and, case of, 40
Aspergilli, 521
Asthma, and hay fever, 825
differences in, in children and adults, 1197
eosinophilis in, 1145
extrinsic, 1187
intrinsic, 1191
studies in, clinical survey of 1074 patients followed for two years, 1185
Asthmatic patients affected by protein of the epidermal group, 1179
Atopy, influence of heredity on, 1135
Auricular fibrillation, acute, case report of, 33, 38
endocarditis, case report of, 34

B

Bacillus acidophilus, effect of, on intestinal putrefaction and indican output, 226
Koch, staining methods for, 514
pyocyaneus keratitis, experimental, 442
tuberculosis, skin reactions with filtrate of Koch strain, 513
B. bifidus, character and isolation from the intestine of infants, 99
B. diphtheria, culture medium for, 101
B. proteus, nature of the soluble proteolytic enzyme of, 393
Bacteria, flagella, abnormal, in cultures, their resemblance to spirochetes, 511
food-poisoning, differentiation of, 90
from infected teeth, localization of, 32
in heart and vascular disease, elective localization of, 31
Bacterial flagella, method for the staining of, 404
flora of cancer of the breast, 616
growth, inhibition, by some amino-acids and its bearing on the use of tryptic digests as culture media, 504
spores, studies upon, 501
Bacteriologic examination of urine for Koch's bacillus, 186
investigation of material containing proteus, 510
Bacteriology and applied immunology for nurses, 408
and immunology, laboratory outlines in, 927
in urinary infection, 818
of bile, 1210
of colds, 1125
of excised tonsils, note upon, 988
of thyroid gland in goiter, 86
Bacteriophage, 818
demonstration of, in old stock cultures, 1074
in sugar media, behavior of, 937
of d'Herelle, studies on, 100
toxicity of, 26
Twort-d'Herelle's, prophylactic and therapeutic possibilities of, 20
Bacterium abortus, is it pathogenic for human beings, 88
Barbituric acid derivatives as anesthetics and methods for administration, 1071
Basal metabolism, calcemia and glycemia in thyroid diseases with increased, 1122
determinations, mask for use in, 590
notes on, 884
Beloved physician, book review, 1211
Benzochol precipitation reaction in serodiagnosis of syphilis, 302
Bile, bacteriology of, 1210
secretion, study of, from a case of biliary fistula, 1067
Biliary antiseptic, unsuccessful experiments with mercurochrome as a, 617
fistula, case of, bile secretion from, 1067
Bilirubin, formation of, 1121
in feces and meconium of nursing infants, 190
of the blood, comparison of the quantitative methods for, 802
Bilirubinemia, variations of, significance of, 304
Biologic significance of soluble specific substances of pneumococci, 303
Birth control, 927
Bismuth in treatment of syphilis, clinical value of, 396
Blood, agar plate for spore-forming anaerobes, 295
agglutination of, method for preventing, by glucose solutions, 369
and urine, chlorides in, rapid method for determination of, 702
nonprotein nitrogen of, Koch and McMeekin method for determination of nitrogen, 286
bilirubin of, comparison of quantitative methods for, 802
calcium, colorimetric method for the estimation of, 718
in eclampsia, 504
cells, photographic method of counting, 456
white, biologic differentiation in, 304
changes in rabbits resembling those in pernicious anemia accompanying B. Welchii infections, 922
chemical changes in pertussis, 514
in pertussis, significance of, 711
chemistry, colorimetric methods, 1131
in eclampsia, 714

Blood—Cont'd
cholesterol findings in syphilis and in other skin diseases, 518
coagulation time and retraction time of, method for the determination of, 1113
color index of, chart for reading, 1108
counts, normal, in pigeons, 437
culture technic, a simple, 607
cultures, observations on, with special reference to the quantity of the blood used, 145
cyanate in the, 617
during pregnancy, lactic acid content of, 814
for chemical examination, note on the measurement of, 911
study, preservation and transportation of, 79
glucose curve, mathematical derivation of the, 318
in the, method for estimation of, 96
glycolysis and lactic acid formation, 251
on rabbit, 240
studies in, 239
groups in general paralysis, 415
hemochromogen crystal test for, 96
hemoglobin content of, standard method of recording, 889
hemolyzed, method of preserving, 611
human, large mononuclear and the transitional leucocyte of, 71
in cases of hypertension, 512
in smallpox during a recent epidemic, 1123
iron and hemoglobin in, colorimetric method for the determination of, 917
iron in, 620
morphology, changes in, 597
plasma, determination of fibrin in, 1092
platelets and corpuscles, effect of pneumococcus extract on, 504
volume measurement of, 282
pressure, 814
and urinary findings in normal pregnancies, 816
in rabbits, method for estimating, 706
proteins, tungstic acid precipitation of, 800
sedimentation, 618, 712
relation of, to pelvic disorders, 89
test, graphic presentation of the, 618
smears, stand for staining, 91
stain, a modified Schuffner's, 93
staining, influence of hydrogen-ion concentration on, 1129
stream inoculation, smallpox without eruption following, 820
sugar, 432, 618, 712
capillary, method for, 906
content and insulin treatment of dermatoses, 1121
curves in epidemic encephalitis, 504
determination of, critical examination or four methods commonly used for the, 403
effect of injections of insulin and dextrose on, 820
estimation of, comparison of Folin-Wu and new Benedict methods for, 278
Blood, sugar estimation—Cont'd
quantitative studies of, 609
in pernicious anemia, 190
in status thymicolymphaticus, 395
transfusion in pernicious anemia, 299
uric acid, blood urico-oxidase and the true value of, 819
in nephritis, 10
urico-oxidase and the true value of the blood uric acid, 819
urine density index, 1100
Body resistance, leucocytic indices of, with report of a new index, 482
Book reviews, 101, 196, 306, 407, 520, 622, 822, 927, 1021, 1131
Breast, cancer of, bacterial flora of, 616
varying degrees of malignancy in, 98
Broader aspects of allergy, 1213
Bronchitis, spirochetal, successfully treated with arsphenamine, 55
Buffer solutions, treatment of acid intoxication with, 467
Burns, pathogenesis of death from, 396
pathology of, 185

C

Calcemia and glycemia in thyroid disease with increased basal metabolism, 1122
Calcium in serum, content of, 303
content of serum of normal adults, 157
in tissues, feces, and milk, determination, of, 399
California hay fever plants, 1164
Cancer, diagnosis of, use of tannin in, 1020
metastasis, mechanism of, 924
of the breast, bacterial flora of, 616
varying degrees of malignancy in, 98
organisms, repeated inoculations of animals with, 616
Cannula, metal, an improvised, 1011
Capillary blood sugar, method for, 906
circulation, influence of, upon certain allergic conditions, 1149
Carbohydrate metabolism, new views on, 719
mediums, stability of, 474
Carcinoma, papillary type, 220
primary, of the lung, 89
Cellobiose as an aid in the determination of members of the colon-aerogenes group of bacteria, 295
Cells, red blood, normal and pathologic fragmentation of, 925
Cerebrospinal fluid, P_H of, colorimetric method for the determination of, 396
chlorides of the, 49
diagnostic value of the sugar content in, 858
modifications in the, in the course of serum reactions, 1127
organic phosphorus of, 845
quantitative estimation of the total protein content in, 1129
sugar and chloride content of, in neurosyphilis, 43
test, 396
value of routine examination of, 615
syphilis, effect of treatment on spinal fluid in, 299

Chambers apparatus, an accessory to, for the isolation of single bacterial cells, 795
Chemical analysis of foods, 196
Chemicomycologic formulas, 83
Chemistry of therapeutic substances, advance in the, 410
toxicologic, studies in, 773
Chemotherapy and serum therapy of pneumococcus and streptococcus meningitis, 1013
of gingivitis, 820
of streptococcemia, 572
principles and practice of, 622
Chicken-pox, leucocytic reactions in, 79
Chloretone anesthesia of dogs, 139
Chloride content of canned sauerkraut, 561
Chlorides in blood or urine, rapid method for determination of, 702
of the cerebrospinal fluid, 49
Cholera infantum, upper respiratory infection as a cause of, 1121
Cholin in paralytic ileus, 430
Chorea, analytic study of, 1120
Chorioepithelioma of ovary, 215
Chronic pollen hay fever and asthma, differences in, in children and adults, 1197
Circulatory-respiratory functional efficiency, clinical tests for the estimation of, 828
tonics vs. circulatory depressants, 814
Clinical interpretation of Wassermann reaction, 308
investigations in allergy, 1159
laboratory methods, 197
procedure, 1131
results with pathogen, 465
Coagulation time and retraction time of blood, method for the determination of, 1113
Coccidioidal granuloma, report of case, with autopsy findings, 57
Colds, bacteriology of, 1125
Colloidal gold solutions, as applied to the Lange reaction, the correction of, 1017
preparation of, 810
Color index, volume index, and saturation index, tables for calculation of, based on recently determined standards, 899
Colorimeter, hydrogen-ion, description of a new, 694
the Gradwohl, 695
Colorimetric determination of phosphorus, 300
method for the determination of iron and hemoglobin in the blood, 917
for determination of P_H of cerebrospinal fluid, 396
for the estimation of blood calcium, 718
in blood chemistry, 1131
Complement-fixation in tuberculosis, 563
reaction in anti-pollen serum, 259
test for syphilis, method of diluting antigens for use in, 594
Congenital syphilis in Boston, twenty-five years of, 1124
Corpuscles, protein, conduct of, as a reflection of certain diseased processes in the human organism, 507
Cortical sclerosis, diffuse, 644
Corynebacterium ulcerans, a pathogenic microorganism resembling C. Diptheriae, 756
Counting blood cells, photographic method of, 456
Creatinine and uric acid in the urine of infants, 922
fate of, when administered to man, 510
Crystalline proteins, urinary proteins, of nephritis, 511
Cults and their relation to medical practice, 1033
Culture media, 715
Cyst, dermoid, lipoidal reaction in wall of, 213
Cystadenoma, papillary, 218
Cystitis, incrusted, with alkaline cystitis, etiology of, 395

D

Decalcification, new method of, 91
Dermatoses, blood-sugar content and insulin treatment of, 1121
D'Herelle's bacteriophage, studies on, 100
Diabetes, compensatory hypertrophy and hyperplasia of the islands of Langerhans in the pancreas of a child born of a mother with, 100
constitutional and hereditary traits in, 1120
mellitus, pathogenesis of, relation of abdominal and rectal infections to, 616
pathology and treatment of, 1021
nature of, 318
necropsy findings in, 1122
Diabetic gangrene treated by insulin, 472
Diagnosis, hookworm, place of the smear in, 715
of gonorrhea by culture, 1018
of rabies, laboratory, eliminating a source of error in, 1130
Diagnostic case, a useful, 1124
Diet, influence of, on the physiologic assay of insulin, 256
Dietetics, practical, in health and disease, 1022
Digestion acid, a modifier, for nonprotein nitrogen determination, 387
Dihydroxyacetone, quantitative determination of, 400
Diphtheria, immunization against, with toxin detoxified with sodium ricinoleate, 89
Diplococcus from measles, studies on, 97
Disease, intraperitoneal, acute, abdominal puncture in the diagnosis of, 403
Diseases of the heart, 822
Dogs, chloretone anesthesia of, 139
Dreyer's defatted antigen, unsuccessful attempts to cure or prevent tuberculosis in guinea pigs with, 305
Drop recorders, 686

E

Eclampsia, 714
blood calcium in, 504
chemistry in, 714
Edema, 711, 713
Electrolytes and nonelectrolytes, influence of, on bile solubility of pneumococci, 96
Encephalitis, epidemic, blood sugar curves in, 504
studies on the etiology of, 1125
Endocarditis and auricular fibrillation, case report of, 35
Endomeba histolytica by culture, practical value of examination for, 503
Endothelioid cell in acute leucemia, 855
Enzymes, 521
Eosinophilia in asthma, hay fever, and allied conditions, 1145
Ephedrin, 624
treatment of hay fever with, 1203
Epidemiology of pneumonia, 309
Epidermal group of proteins, treatment of asthmatic patients, affected by, 1179
Epilepsy, spinal fluid in, 819
Erysipelas antistreptococci serum, etiology and treatment with, 403
Erythrocyte sedimentation reaction, relation of, to the ability of flocculation of the plasma and serum, 712
Erythrocytes, antigenic nature of, duality of, 979
and hemoglobin in the south, 679
Etiology, and epidemiology of impetigo contagiosa neonatorum, 97
and pathology of granuloma inguinale, 506
of peptic ulcer, 921
and treatment of pernicious anemia, 921
with erysipelas antistreptococci serum, 403
of granuloma inguinale, 929
of incrusted cystitis with alkaline cystitis, 395
of malignant neoplasms, 1013
of tumors, 296
Examination of cerebrospinal fluid, value of routine, 615
Exsanguination-transfusion in treatment of phenol poisoning, 313
Extrinsic asthma, 1187
Exudate from nutrient agar slants, 715

F

Fat of feces, determination of amount and composition of, 294
Fats and lipoids, an aldehyde mordant for, 91
Feces, and meconium, bilirubin in, of nursing infants, 190
parasitic ova in, cedar oil as an aid in finding, 1117
Fibrillation, acute auricular, case report of, 33, 38
auricular, and endocarditis, case report of, 34
Fibroadenoma, 218
glandular type, 221
nonglandular type, 221
Fibroma, arising from wall of blood vessel, 221
degenerative change in, 222
sarcomatous degeneration of, 223
Filter candles, effect of paraffin and oil substances upon, 158
Flocculation, in tuberculosis, 193
tests in the serology of syphilis, 891
Food-poisoning bacteria, differentiation of, 90
Foods, chemical analysis of, 196
Folliculoma ovarii, 216
Folin-Wu blood-sugar values, correction of, 398
and new Benedick methods, for the estimation of blood sugar, comparison of, 278
comparison of, for sugar in blood and cerebrospinal fluid, 712
Footprints, 1217
Formaldehyde-sulphuric acid reaction of the opium alkaloids, 773
Formulas, chemicomycologic, 83
mycologic, 82
French azure C. tissue stain, modification of, 511
Frozen section methods, difficulties and value of, 492
sections, new method of mounting fixed, 1014
Fungi of blastomycosis, infective and significance of a newly described ascospore state for the, 501

G

Gangrene, diabetic, treated by insulin, 472
Gasometer gas analysis method, simplified calculation for, 884
Gas poisoning, sodium thiosulphate and calcium salts in prevention of the sequelae of illuminating, 109
Gastric, movements in the pigeon, with economy of animal material, 1003
secretion in nephritis, 362
Gastro-duodenal ulceration, surgery of, 823
Gentian violet solutions, preparation of, for intravenous injection, 78
Gingivitis, chemotherapy of, 820
Glomerulonephritis, acute, experimental production of, 815
Glucose, in the blood, method for estimation of, 96
in the urine, fallacies of the yeast method of detecting, 80
tolerance test, 380
utilization in renal glycosuria, 506
Glycol-chloretone anesthesia, 882
notes on, 882
Glycolysis, blood, on rabbit, 240
blood, studies in, 239
on ox blood in vitro, 240
Glycosuria, 1128
renal, glucose utilization in, 506
Goiter, bacteriology of thyroid gland in, 86
exophthalmic, histologic changes following administration of iodine in, 821
nonsurgical types and treatment, 823

Gonococcus and meningococcus, cultivation of, 405
in man, agglutination of, 716
white of egg culture medium for the, 79
vaccines with urotropin, 95
Gonorrhea, diagnosis of, by culture, 1018
Gradwohl colorimeter, 695
Gram stain, notes on, 405
Granuloma, coccidioidal, report of case with autopsy findings, 57
studies in, 1020
inguinale, etiology and pathology of, 506
etiology of, 926

H

Hay fever, and asthma, 825
differences in, in children and adults, 1197
eosinophilia in, 1145
plants of California, 1164
treatment of, with ephedrin, 1293
Heart, action of indol and skatol on the, 991
and vascular disease, bacteria in, elective localization of, 31
diseases of, 822
Hematoxylin-eosin staining method for paraffin sections, 515
Hemendotheliocyte, 74
Hemochromogen crystal test for blood, 96
Hemoglobin and erythrocytes in the South, 679
content of blood, standard method of recording, 889
Hemolyzed blood, method of preserving, 611
Hemophilia, blood clotting studies in, 1122
Hemorrhages, their significance and methods of treatment, 921
Heredity, influence of, on atopy, 1135
Hexylresorcinol, in treatment of pyelitis of infancy and childhood, 401
in urology, clinical application of, 401
Hip joint, tuberculous disease of, diagnosis, treatment and end results of, 410
Hookworm, diagnosis, place of the smear in, 715
infections, evaluation of the methods of Stoll and Lane in, 715
estimation of the number of, harbored, by the use of the dilution egg count method, 716
Hospital laboratory work, integration of, 666
Hydrogen-ion colorimeter, description of a new, 694
concentration, 522
determinations, buffer mixture for the alkaline range of, 194
influence of the, on blood staining, 1129
of capillary blood, micromethod for estimation of, 293
Hypertension, blood in cases of, 512
ultimate, results of essential, 814
Hypercholesterolemia, 189
Hypersensitiveness, studies in, 1135
Hypo- and hypercalcemia, experimental, state of serum calcium in, 514

I

Icterus index, modification of, 813
Immune properties, isolation of substance with, 619
Immunity, 619
relation of anaphylaxis to, 505
rôle of the reticulo-endothelial system in, 716
Immunization against diphtheria with toxin detoxified with sodium ricinoleate, 89
against scarlet fever, active, dosage of toxin for, 511
of the pneumococcus, 504
of rats against pneumococcus by feeding the acid-killed germs and the influence of the age of the animal thereon, 566
against scarlet fever with toxin detoxified with sodium ricinoleate, 89
of sheep by means of anthrax bacilli attenuated with sodium chloride, 926
Immunology, and bacteriology, laboratory outlines in, 927
Impetigo contagiosa neonatorum, etiology and epidemiology of, 97
Indol, and skatol, action of, on the heart, 991
oxalic acid test for, 501
Infantile progressive muscular atrophy, early, clinical and pathologic study of cases, 837
Infection, urinary, bacteriophage in, 818
Infections, abdominal and rectal, relation of, to the pathogensis of diabetes mellitus, 616
of the skin and its appendages, superficial yeast, 395
Insanity and law, 197
Insulin, and dextrose, effect of injections, on blood sugar, 820
diabetic gangrene treated by, 472
hypodermic, effect of, in normal subjects, 116
effect of, in diabetic subjects under control, 117
in normal subjects, 116
in underweight normal subjects, 117
on fasting blood sugar in normal and diabetic subjects in relation to percentage normal weight, 115
physiologic assay of, influence of diet on, 256
Interagglutination of maternal and fetal blood in the late toxemias of pregnancy, 617
Intestinal amebiasis from the pathologist's standpoint as related to the clinical picture, 451
antiseptics, action of certain alleged, 397
putrefaction and indican output, effect of bacillus acidophilus on, 226
Intradermal salt solution test in normal and toxemic pregnancies, 713
Intraperitoneal disease, acute, abdominal puncture in diagnosis of, 403
Intrinsic asthma, 1191
Iodin, histologic changes following administration of, in exophthalmic goiter, 821

Iron, and aluminum, pharmacology of, in relation to therapeutic uses, 790
in cooking utensils, 791
pharmacology of, in relation to therapeutic uses, 790
and hemoglobin in the blood, colorimetric method for the determination of, 917
hematoxylin method, a quick, 405
in biologic materials, quantitative methods for the determination of, 401
in blood, 620
tissues and urine, determination of, 620
Isopropyl alcohol experiments of human beings, 336
in preparation of Wassermann antigens, 52
physiologic properties of, 326

J

Jahnel's method for staining spirochetes in nerve tissue, 92
Jaundice, method of estimating the amount of, by means of the blood serum, 505

K

Kahn, flocculation test, comparison between the, the Kolmer-Wassermann test, and the Ruediger-Wassermann test, 269
precipitation test, device for the dilution of antigen in, 1096
rapid-mixing flasks for the preparation of the standard antigen dilution used in the, 182
Kaiserling method for preserving gross specimens, modification of, 517
Keratitis, bacillus pyocyaneus, experimental, 442
Kidney diseases, 203
Kidneys, physiologic and anatomic changes following temporary ischemia of the, 349
Klottman's reaction, basal metabolism, and biologic tests, 1123
Koch and McMeekin method for determination of nitrogen, with special reference to nonprotein nitrogen of blood and urine, 286
bacillus, staining methods for, 514
Koch's bacillus, bacteriologic examination of the urine for, 186
Kolmer quantitative test, comparison of, with the routine Wassermann, 296
test, a simplification, not a modification of, 1109
Kottmann reaction, diagnostic value of, in thyroid dysfunction, 713
Kramer-Gittleman modification of the method of Folin and Wu, study of the accuracy of, 432
Kymograph, long paper, new type of motor-driven, 170

L

Lactic acid content, chemical changes in the spinal fluid in meningitis, with special reference to, 815
Laboratory, examinations—not laboratory tests, 1133
work, hospital, integration of, 666
Lactobacillus, acidophilus, 201
cultural characteristics of, 1053
Lange reaction, colloidal gold solutions as applied to, correction of, 1017
Lead chloride, intravenous administration of, 559
Leprosy, pathology of, 1127
Leucemia, acute, endothelioid cell in, 855
and the central nervous system, 1013
Leucocyte counts, differential, in the counting chamber, combined diluting and staining fluid for, 548
of human blood, transitional, 71
Leucocytes, large mononuclear, 73
Leucocytic indices of body resistance with report of a new index, 482
reactions, in chicken-pox, 79
in measles, 79
in mumps, 79
in scarlet fever, 79
in smallpox, 79
Lipoidal reaction in wall of dermoid cyst, 213
Liver function test, 188, 518, 523
tumors of the, four unusual malignant, 100
Lobar pneumonia, nasal passages in, 512
Local anesthesia, studies in, 983
Lowenstein's procedure for direct isolation of the tubercle bacillus from sputum, 98
Luetic milk, Wassermann and flocculation reaction in, 1123
Luetin test, nonspecificity of the, 513
Lung, carcinoma of the, 89
Lymphadenitis, epidemic, with formation of abscess in guinea pigs due to infection with hemolytic streptococcus, 119
Lymphendotheliocyte, 73
Lymphoblastoma, 1119
age and sex incidence, duration of disease, and the effect of roentgen-ray and radium irridiation and surgery, 187

M

Mackenzie, the Beloved Physician, 1211
Magnesium salts, influence of, on amboceptor and complement titrations, 153
Malaria in the treatment of general paralysis, 925
Manganese in urine, its detection and determination, 509
Mask for use in basal metabolism determinations, 590
Micro-Kahn test in syphilis, study of, 946
Measles, diplococcus in, 97, 98
leucocytic reactions in, 79
prevention of, by immune goat serum, 97
prophylaxis, use of blood from convalescents in a school epidemic, 1121
Media, differential, use of potassium tellurite in, 194
special liquid, simplified method for the preparation of, by filtration, 1009

Medical diagnosis, 824
education, Japanese, 826
practice, cults and their relation to, 1033
Medicine, aviation, 103
preventive, 101
an historical outline, 199
Meninecke microreaction in syphilis, 88
Meningitis, pneumococcus and streptococcus, chemotherapy and serum therapy of, 1013
spinal fluid in, significant chemical changes in, 815
Mercurials, 1128
Mercuric chloride poisoning, acute, 518
Mercurochrome, 617
as a biliary antiseptic, unsuccessful experiments with, 617
present status of, 923
treatment of experimental peritonitis by, 1119
Mercurochrome—220 soluble, effect of, on the germicidal properties of fresh defibrinated blood, 78
Mesenteric enterocystoma, 427
Metabolic rate determinations, preparation of potassium pyrogallate solution for, 287
Metabolism, basal, notes on, 884
carbohydrate, new views on, 719
Metal cannula, an improvised, 1011
Metastasis, cancer, mechanism of, 924
of thyroid gland from endothelial myeloma of bone, 878
Method, colorimetric, for the determination of P_H of cerebrospinal fluid, 396
for the estimation of blood calcium, 718
for determination of chlorides in blood and urine, 702
for demonstration of small quantities of gold in organic substances, 83
for the determination of the coagulation time and retraction time of the blood, 1113
for estimating blood pressure in rabbits, 706
for estimation of glucose in the blood, 96
for obtaining single colonies of tubercle bacilli, 92
for the preparation of potassium pyrogallate solution for metabolic rate determinations, 287
of special liquid blood media by filtration, 1009
for the staining of bacterial flagella, 404
Jahnel's, for staining spirochetes in nerve tissue, 92
of administration and apparatus for oxygen therapy, 388
of collecting small amounts of serum, 184
of estimating the amount of jaundice by means of the blood serum, 505
of counting blood cells, photographic, 456
of decalcification, a new, 91
of diluting antigens for use in complement-fixation test for syphilis, 594
of examining fresh tissue, 1035
of isolating and cultivating vibrios from feces, 302
of mounting fixed frozen sections, 1014
of preserving hemolyzed blood, 611
Method—Cont'd
of reading microreactions macroscopically, 397
of recording the hemoglobin content of blood, 889
quick iron-hematoxylin, 405
Methods, clinical laboratory, 197
Folin-Wu and new Benedict, for estimation of blood sugar, comparison of, 278
for making a stable emulsified syphilitic antigen, 908
for preventing agglutination of blood by glucose solutions, 369
of Stoll and Lane, evaluation of, in light hookworm infections, 715
quantitative, for determination of iron in biologic materials, 401
Micro-method for estimation of hydrogen ion concentration of capillary blood, 293
Microreaction, Meinecke, in syphilis, 88
Microreactions, method of reading, macroscopically, 397
Microscope, variable filter for the, 116
Microscopic slide precipitation test for syphilis, 477
Midwifery mechanics, 408
Monilia, from the respiratory tract, 968
isolation of, from the skin scales, mouth and sputum in psoriasis, 97
Mononuclear, large, and the transitional leucocyte of human blood, 71
Motility of animals, spontaneous, apparatus for measuring, 289
Mumps, leucocytic reactions in, 79
Muscular atrophy, early infantile progressive, clinical and pathologic study of cases of, 837
Mycologic formulas, 82
Myeloma of bone, endothelial, metastasis to thyroid gland from, 878
Myocarditis, acute, case report of, 33
phlebitis, case report of, 37
case report of, 38
with angina pectoris, case report of, 39

N

Nasal passages in lobar pneumonia, 512
clinical and bacteriologic study, 303
Nematode parasites of verebrates, 199
Neoplasms, 819
malignant, etiology of, 1013
Nephelometer, new type of, 632
Nephelometry, 629
Nephritis, 815, 824
blood uric acid in, 10
chronic, thyroid therapy and thyroid tolerance in, 815
skin tests in, 1
functional pathology of, 204
gastric secretion in, 362
studies on, 349, 362
urinary proteins, crystalline proteins of, 511
Nervous system, central, leucemia and, 1013
Nerve tissue, Jahnel's method for staining spirochetes in, 92
rapid stain for, 516
Neurologic fragments, 407

Neurosyphilis, sugar and chloride content of cerebrospinal fluid in, 43
syphilitic alopecia in relation to, 295, 519
Nonprotein nitrogen determination, modified digestion acid for, 387
Nutrient media, preparation of, for cultivation of germs, 84
Nutrition, new knowledge of, 1131

O

Ochronosis, 461
Obstetrics, 927
and gynecology, sedimentation test in, 99
Obesity, 928
Omentum, reactions of the, 1028
Operations, field, in the World War, 1021
Oral administration of pollen, 1156
Organic phosphorus of the cerebrospinal fluid, 845
Ovary, choriocepithelioma of, 215
tumors of the, analysis of 500, 211
Oxalic acid, a good white cell diluting fluid, 614
test for indol, 501
Oxidase and peroxidase reactions, experience with, 91
Oxygen consumption of dog, rubber mask for determination of, 378
therapy, 388

P

Pancreatic function, value of starch-iodine reaction as a test of, 297
Para-amino-benzoate compounds, further observations of, on the rabbit eye, 983
Paraffin, embedding of tissue, rapid, 515
sections, hexatoxylin-eosin method for, 515
Paralysis, general, malaria in the treatment of, 925
blood groups in, 415
Paralytic ileus, use of cholin in, 430
Paratyphosus B., single cell strains of, production of toxic substances in young cultures of, 90
Parasitic ova in feces, cedar oil as an aid in finding, 1117
protozoa of man, 196
Paresis, general, simple test of diagnostic value in, 99
Pathogen, clinical results with, 465
Pathogenesis of death from burns, 396
of diabetes mellitus, relation of abdominal and rectal infections to, 616
Pathogenicity of the small races of the ameba of dysentery, 743
Pathology and treatment of diabetes mellitus, 1021
functional, of nephritis, 204
of burns, 185
of leprosy, 1127
textbook of, 200
Peptic ulcer, etiology and pathology of, 921
Pernicious anemia, 817
accompanying B. Welchii infection, blood changes in rabbits resembling those in, 922
Pernicious anemia—Cont'd
blood sugar in, 190
transfusion in, 299
etiology and treatment of, 921
familial, 1014
high color indices in, 714
progress in the treatment of, 722
treatment of, by special diet, 819
Peritonitis, experimental, treatment of, by mercurochrome, 1119
Pertussis, blood chemical changes in, 514
significance of, 714
Pharmacology of iron and aluminum in relation to therapeutic uses, 790
Phenol poisoning, exsanguination-transfusion in treatment of, 313
Phenylhydrazin hydrochloride, polycythemia vera treated with, 597
Phlebitis, acute, and myocarditis, case report of, 37
recurrent acute, and arteritis, case of, 40
Phosphorus, colorimetric determination of, 300
Photographic method of counting blood cells, 456
Physical signs, normal, manual of, 1132
Physiology, comparative, 202
Pigeon, gastric movements in the, with economy of animal material, 1003
Pigeons, normal blood counts in, 437
Pigment in Addison's disease, study of, 438
Pilocarpin, action of, on the rat's pupil, 232
Pipette, precision leucocyte, 550
Plague bacilli, viability of, in stained smears, 195
Pneumococci, biologic significance of soluble specific substances of, 303
Pneumococcus and streptococcus meningitis, chemotherapy and serum therapy of, 1013
extract, effect of, on the blood platelets and corpuscles, 504
immunization of rats against, by feeding the acid-killed germs and the influence of the age of the animal thereon, 566
of the, 504
production of purpura by derivatives of, 503
Type I, in sputum, failure of the mouse test to demonstrate the presence of, 944
IV, spontaneous death in a rabbit with the isolation of a, 1065
Pneumonia, diathermy with special reference to, 825
epidemiology of, 309
lobar, nasal passages in, 512
clinical and bacteriologic study, 303
treatment of, 931
Type I, recurrent, 517
Poisoning, mercuric chloride, 518
phenol, exsanguination-transfusion in treatment of, 313
Poliomyelitis, outbreak of, apparently milk borne, 817
precipitin reaction, further studies of, 1126
skin reaction in, 818, 1125

Pollen antigens, comparative study of, as determined by skin reaction, 1139
content of the air, factors which determine, 1151
grains, structural features in identifying, 1164
oral administration of, 1156
Polycythemia vera, case of, treated with phenylhydrazin hydrochloride, 597
Potassium and sodium tetrabismuth tartrates, preparation of, 962
pyrogallate solution, preparation of, for metabolic rate determinations, 287
tellurite, use of, in differential media, 194
Pregnancies, normal and toxemic intradermal salt solution test in, 713
blood pressure and urinary findings in, 816
Pregnancy, early diagnosis of, by precision, 615
interagglutination of maternal and fetal blood in the late toxemias of, 819
lactic acid content of the blood during, 814
toxemia of, acidosis in, 816
toxemias of, interagglutination of maternal and fetal blood in the, 617
Preparation of high-class nutrient media for the cultivation of germs which are very difficult to grow, 84
Prescription notes, 307
Preventive medicine, private practitioner as pioneer in, 308
Principles of diagnosis and treatment in heart affections, 1211
Protein, corpuscles, conduct of, as a reflection of certain diseased processes in the human organism, 507
of the epidermal group, treatment of asthmatic patients affected by, 1179
Proteins, of blood plasma, effect of venous stasis on the, and on the rate of sedimentation of the red blood corpuscles, 735
urinary, crystalline, of nephritis, 511
Proteus, bacteriologic investigation of material containing, 510
Psoriasis, isolation of monilia from the skin scales, mouth, and sputum in, 97
Puerperal fever, streptococcus hemolyticus toxin and antitoxin, 305
Pulmonary arteritis, 409
artery, sclerosis of, 411
Pyelitis of infancy and childhood hexylresorcinol in treatment of, 401
Pygmalion or the doctor of the future, 200

Q

Quantitative, blood-sugar estimation, studies of, 609
determination of dihydroxyacetone, 400
methods for the bilirubin of the blood, comparison of, 802
for the determination of iron in biologic materials, 401

R

Rabies, eliminating a source of error in the laboratory diagnosis of, 1130
Radium, therapeutic uses in general practice, 306
Rapid mixing flasks for the preparation of the standard antigen dilution used in the Kahn precipitation test, 182
Rat-bite fever, cultivation of the spirillum of, 97
Reaction, anticomplementary, of blood serum to the Kolmer complement fixation test controlled by the reaction to the Kahn precipitation test, 265
benzochol precipitation, in the serodiagnosis of syphilis, 302
complement-fixation, in antipollen serum, 259
formaldehyde-sulphuric acid, opium alkaloids, 773
Kottmann, diagnostic value of, in thyroid dysfunctions, 713
lipoidal, in wall of dermoid cyst, 213
skin, in poliomyelitis, 818
starch-iodine, value of, as a test of pancreatic function, 297
Wassermann, clinical interpretation of, 308
in rabbit syphilis, 924
Van Den Bergh, for serum bilirubin with notes on interpretation and technic, 529
Red blood cells, normal and pathologic fragmentation of, 925
Renal glycosuria, glucose utilization in, 506
insufficiency, relationship between anemia and, 512
Reports of St. Andrew's Institute for Clinical Research, 1211
Respiratory infection, upper as a cause of cholera infantum, 1121
tract, monilia from the, 968
Rheumatic fever, analytic study of, 1120
Rhinitis, allergic, 1162
Ringworm fungi, cultural study of, 86
Romanowsky-Giemsa stain, buffered water for, 510
Rubber mask for determination of oxygen consumption of the dog, 378
Russell double sugar tube, mechanism of, 94
Russian thistle pollen, 1142

S

Saliva, urea and ammonia nitrogen of, quantitative method for the determination of, 1015
Salivary glands in teratoma, 215
Salmonella suipestifer, infection of man, probably due to, 141
Sauerkraut, canned, chloride content of, 561
Sarcoma, polymorphous cell, 224
spindle-cell, with little stroma, 224
Scarlet fever, 512
antitoxin, preparation and clinical application of, 821
control of, in institutions, 816
dosage of toxin for active immunization against, 511

Scarlet fever—Cont'd
immunization against with toxin detoxified with sodium ricinoleate, 89
leucocytic reactions in, 79
streptococcus scarlatinae in, rôle of the washings of, 274
Schuffner's blood stain, a modified, 93
Sclerosis, cortical, diffuse, 644
of the pulmonary artery, 411
Sedimentation, blood, 618, 712
of the red blood corpuscles, effect of venous stasis on the proteins of blood plasma and on the rate of, 735
rates, 739
rate of erythrocytes, the corpuscle volume, and the icterus index, 373
test, blood, graphic presentation of the, 618
in obstetrics and gynecology, 99
Serodiagnosis of syphilis, benzochol precipitation reaction in, 302
Serology of syphilis, flocculation tests in, 891
Serum, antipneumonococcus, specific precipitates obtained from, and antibody solution by the soluble specific substances of pneumococci, 303
antipollen, complement-fixation reaction, 259
applied in gynecology, Lang and Huer's photochemical test of, 190
bilirubin, Van Den Bergh reaction for, 529
calcium in, content of, 303
erysipelas antistreptococci, etiology and treatment with, 403
method of collecting small amounts of, 184
of normal adults, calcium content of, 157
Sheep cells, preservation of, for use in complement fixation tests, 255
Skin reaction in poliomyelitis, 818, 1125
measles, 98
of the toxins from hemolytic streptococci from puerperal and scarlet fever, comparison of, 404
pollen antigens determined by, 1139
with filtrate of Koch strain of bacillus tuberculosis, 513
tests in chronic nephritis, 1
Smallpox, leucocytic reactions in, 79
the blood in, during a recent epidemic, 1123
with eruption following blood stream inoculation, 820
Smears, stained, viability of plague bacilli in, 195
Sodium thiosulphate and calcium salts in prevention of sequelae of illuminating gas poisoning, 109
Solutions, gentian violet, preparation of, for intravenous injection, 78
Specimens, gross, modification of the Kaiserling method for, 517
Sphygmomanometer, recording, an adjustable sphygmoscope for the, 172
Spinal fluid and blood, chlorides in, 49
in epilepsy, 819
tryptophane reactions in, 1048
Spirocheta dentinum, cultivation of pure cultures of, 187
pallida, cultivation of pure cultures of, 187
immunologic strains of, 924
purification of cultures of, by chemical methods, 1017
recurrentis, cultivation of pure cultures of, 187
bronchitis, successfully treated with arsphenamine, 55
Sputum examination in so-called closed tuberculosis, 89
Stain for nerve tissue, rapid, 516
french azure C. tissue, modification of, 511
Romanowsky-Giemsa, buffered water for, 510
Stained smears, viability of plague bacilli in, 195
Staining, acid fast and gram, error in, due to petrolatum, 97
dish, a new, 716
of bacterial flagella, method for the, 404
of entameba in sections, technic for selective, 398
method for paraffin sections, rapid hematoxylineosin, 515
methods for the Koch bacillus, 514
myelin, Weigert-Paul technic for, 406
technic, 716
Status thymicolymphaticus, blood sugar in, 395
Stoll and Lane methods, evaluation of, in light hookworm infections, 715
Streptococci, hemolytic, separation of a soluble specific substance from, 94
Streptococcemia, chemotherapy of, 572
Streptococcus scarlatinae in scarlet fever, rôle of the washings of, 274
Stroma, ovarii, 222
Structural features of pollen grains, rôle in identifying the most important hay fever plants in California, 1164
Sugar and chloride content of cerebrospinal fluid in neurosyphilis, 43
content in the cerebrospinal fluid, diagnostic value of, 858
in blood, 432
and cerebrospinal fluid, comparison of the Folin-Wu and the new Benedict method for, 712
determination of, critical examination or four methods commonly used for, 403
in normal urine, determination of, 579
media, bacteriophage in, behavior of, 937
tolerance tests, further observations of, in pregnancy, 615
tube, Russell double, mechanism of, 94
Sulphemoglobinemia, 95
Surgical conditions, acute, differential count in, 89
Syphilis, and other skin diseases, blood cholesterol findings in, 518
cerebrospinal, effect of treatment on spinal fluid in, 299
complement-fixation test for, method of diluting antigens for use in, 594

Syphilis—Cont'd
congenital, in Boston twenty-five years of, 1124
Meinecke microreaction in, 88
micro-Kahn test in, 946
microscopic slide precipitation test for, 87, 477
of the central nervous system, 861
rabbit, Wassermann reaction in, 924
serology of, flocculation tests in, 891
serodiagnosis of, benzochol precipitation reaction in, 302
serum diagnosis of, error of basing, on the Kahn reaction alone, 296, 505
the Vernes flocculation test for, 1127
treatment of, clinical value of bismuth in, 396
Wassermann test for, studies in, 303
Syphilitic alopecia, its relation to neurosyphilis, 295, 519
antigen, methods for making a stable emulsified, 908
patients, study of testes from, 1124
Syphilology, modern clinical, 520

T

Tannin, use of, in diagnosis of cancer, 1020
Tartrates, potassium and sodium tetrabismuth, preparation of, 962
Technic for selective staining of entameba in sections, 398
Teratoma, choroid plexus in, 212
pacchionian bodies in, 212
retinal pigment in, 213
salivary glands in, 215
squamous-cell epithelioma arising in, 217
thyroid tissue in, 214
Test, blood sedimentation, graphic presentation of, 618
cerebrospinal fluid, 396
cutaneous, for a hydrophilic condition, 711
for syphilis, microscopic slide precipitation, 477
glucose tolerance, 380
hemochromogen crystal, for blood, 96
intracutaneous salt solution, its use as a test of the efficiency of the circulation in the extremities, 193
intradermal salt solution, in normal and toxemic pregnancies, 713
Kahn precipitation, rapid-mixing flasks for the preparation of the standard antigen dilution used in the, 182
Kolmer, a simplification, not a modification of, 1169
quantitative, comparison of, with the routine Wassermann, 296
Lange and Huer's photochemical, of serum applied in gynecology, 190
liver functional, 523
luetin, nonspecificity of, 513
micro-Kahn, in syphilis, study of, 946
microscopic slide precipitation, for syphilis, 87
of pancreatic function, value of a starch-iodine reaction as a, 297
oxalic acid, for indol, 501
Test—Cont'd
quantitative, of digestive pancreatic activity easily applied clinically, 190
sedimentation, in obstetrics and gynecology, 99
simple, of diagnostic value in general paresis, 99
tuberculin, new method for, 817
Wassermann, for syphilis, studies in, 303
Testes, study of, from syphilitic patients, 1124
Tests, clinical, for the estimation of circulatory-respiratory functional efficiency, 828
complement-fixation, preservation of sheep cells for use in, 255
flocculation, in the serology of syphilis, 891
liver functional, 188, 518
ring and flocculation, in tuberculosis, 1023
skin, in chronic nephritis, 1
tuberculin, 617
Wassermann and Kahn, comparison of 10,000, run in parallel, 1087
Tetraethyl lead and inorganic lead salts, toxicity of, 554
oral administration of, 558
Therapeutics, materia medica and pharmacy, 1132
Thermoelectric apparatus, portable, for the determination of surface and tissue temperatures, 913
Throat infections with streptococcus scarlatinae without a rash, 94
Thromboangiitis obliterans, case report of, 37
Thyroid disease, 713
dysfunctions, diagnostic value of the Kottmann reaction in, 713
gland, 1021
bacteriology of, in goiter, 86
metastasis to, from endothelial myeloma of bone, 878
tissue in teratome, 214
therapy and thyroid tolerance in chronic nephritis, 815
Timothy pollen, 1143
Tissue, fresh, new method of examining, 1035
rapid paraffin embedding of, 515
Tissues, feces and milk, determination of calcium in, 399
Tonsils, excised, bacteriology of, 988
Toxemia of pregnancy, acidosis in, 816
Toxemias of pregnancy, late, interagglutination of maternal and fetal blood in, 617
Toxicity of tetraethyl lead and inorganic lead salts, 554
Toxicologic chemistry, studies in, 773
Toxicology, memoranda of, 102
Toxin-antitoxin, hypersensitivity to its protein content, 88
precipitate of Ramon, antigenic value of, 503
Treatment of acid intoxication with buffer solutions, 467
of asthmatic patients affected by protein of the epidermal group, 1179

Treatment—Cont'd
of general paralysis, malaria in the, 925
of hay fever with ephedrin, 1203
of pernicious anemia, treatment of, 722
of phenol poisoning, exsanguination-transfusion in, 313
of pneumonia, 931
of pyelitis of infancy and childhood, hexylresorcinol in, 401
of syphilis, bismuth in, 396
Treponema pallida, cutaneous tests with suspensions of, 514
Treponematosis as seen in the rural population of Haiti, 670
Tryptophane reactions in the spinal fluid, 1048
Tubercle bacilli, method for obtaining single colonies of, 92
bacillus, carbon dioxide in the growth of, 90
from sputum, Lowenstein's procedure for direct isolation of, 98
Tubercles, culture of, in the diagnosis of tuberculosis, 1018
Tuberculin, active principles of, prepared from nonprotein substances, 1019
human and bovine, intracutaneous tests with, 617
old, preparation of residue antigens from, 505
specific elements of, chemical study of, 505
standardization of, 169
test, new method for, 817
tests, 617
Tuberculous disease of the hip joint, diagnosis, treatment and end-results of, 410
meningitis, 863
Tuberculosis, 717
closed, sputum examination in, 89
complement fixation in, 563
culture of tubercles in the diagnosis of, 1018
flocculation in, 193
in guinea pigs, unsuccessful attempts to cure or prevent, with Dreyer's defatted antigen, 305
ring and flocculation tests in, 1023
vital staining in experimental, 510
Tumor, Krunkenberg, 216
Tumors, etiology of, 296
of the ovary, analysis of, 211, 500
of the liver, four unusual malignant, 100
malignant, of the adrenal in children, 130
Tungstic acid precipitation of blood proteins, note on, 800
Twort-D'Herelle's bacteriophage, prophylactic and therapeutic possibilities of, 20
Typhoid-paratyphoid carriers, experimental, 617

U

Ultraviolet light, some recent works on, 1212
Urine, albumin and sugar in, apparatus for rapid quantitative routine determination of, 1205
bacteriologic examination of, for Koch's bacillus, 185
Urine—Cont'd
acid and alkaline, comparison of values on, 586
glucose in the, fallacies of the yeast method of detecting, 80
manganese in, detection and determination of, 509
method of determination of iron in, 620
normal, comparative values on, 580
determination of sugar in, 579
of infants, uric acid and creatinine in, 922
preservatives, 1098
reducing substances in, 15
United States public health service, 628
Urea and ammonia nitrogen of saliva, quantitative method for the determination of, 1015
Uremia, 617
Uric acid, and blood sugar, determination of, new titrimetric principle and its application to, 618
and creatinine in the urine of infants, 922
blood in nephritis, 10
Urinary infection, bacteriophagy in, 818
proteins, crystalline proteins of nephritis, 511
sediment, number of formed elements in, 925
sediments, 926
Urology, hexylresorcinol in, clinical application of, 401
Urotropin, gonococcus vaccines with, 95

V

Vaccines, gonococcus, with urotropin, 95
Vaginal flora during childhood and puberty, 821
Van Den Bergh reaction for serum bilirubin with notes on interpretation and technic, 529
Venous stasis, effect of, on the proteins of blood plasma and on the rate of sedimentation of the red blood corpuscles, 735
Vernes flocculation test for syphilis, 1127
Vibrios from feces, method of isolating and cultivating, 302
Volume measurement of blood platelets, 282

W

Wassermann, and flocculation reaction in luetic milk, 1123
and Kahn tests, comparison of 10,000 run in parallel, 1087
antigen, origin and nature of the, 973
antigens, isopropyl alcohol in preparation of, 52
reaction, cells and globulin content, relationship of the, and the colloidal precipitation reaction in spinal fluid in syphilitics, 762
clinical interpretation of, 308
in rabbit syphilis, 924
reactivation of, 1126

Wassermann—Cont'd
slightly positive, menace of the, 627
technic, a comparison of antigens in, 865
associated considerations of, 865
three phases of, 865
test for syphilis, studies in, 303
tests, 156
Weigert-Paul technic for staining myelin, 406
White cell diluting fluid, oxalic acid a good, 614
Willis floatation method, accuracy of, in diagnosis of light hookworm disease, 715

X

X-ray and radium, introduction to the study of, 407

Y

Yeast method of detecting glucose in urine, fallacies of the, 80
